DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 31, 2007 has been entered.

Response to Arguments

2. Applicant's arguments with respect to claims 14, 15, and 18 have been considered but are moot in view of the new grounds of rejection.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 14, 15, and 18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor, at the time the application was filed, had possession of the claimed invention. The last lines of claim 14, as amended,

state "...wherein said first and second codes must be entered each time a credit is added or redeemed." However, the originally filed specification states that when a credit is added, only the first code must be entered, and when a credit is redeemed, only the second code must be entered (pages 21-22). The claims, in their current state, mandate that both codes must be entered for either addition or redemption of credits, which is a feature that is not supported or even suggested by the originally filed specification. Consequently, claims 15 and 18 are also rejected under 35 U.S.C. 112 for depending on rejected claim 14.
